Pigment
Products

100%
Consistent

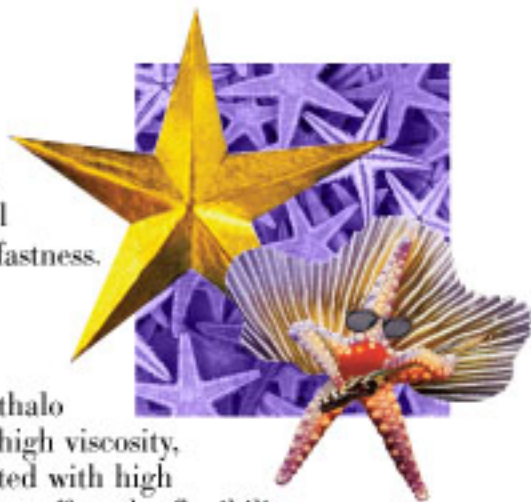

The benefits of consistent composition.

A truly automated pigment production line for red, blue and yellow gives you the advantage of long term reliability. Our fully automated, computerized system provides the benefits of consistent pigment composition. Our customers are assured that Apollo pigments are very, very consistent day to day... year to year.

Aries® Carbazole Violet

A new high solids quickset flush color. Blend it with reds to create an artificial reflex with excellent full strength lightfastness.

Aries® Phthalo Green

The unique vehicle system of Aries Phthalo Green allows ink makers to formulate high viscosity, low yield value inks commonly associated with high quality ink systems. It also offers the flexibility to formulate high solids systems, work and turn, dry offset and inks for various substrates.

Dorado Series High Solids Quickset Flush

Low Cost!
Low VOCs!

Developed specifically as a low cost, low VOC (less than 5%) high solids system. Dorado offers stable tack with good ink/water balance. It delivers high print performance for short and long press runs and provides a consistent set speed with excellent compatibility over a wide variety of let back vehicles.

Type	Pigment %	Solids %	Class
Rubine Red	37	97	Red 57:1
Diarylide Yellow	38	97	Yellow 12
Phthalo Blue G	43	97	Blue 15:3
Red Lake C	45	95	Red 53:1

Aries® Series

Here is Apollo's popular and established high solids quickset flush color line. Designed for use in the manufacture of low VOC sheetfed inks, this series is formulated to impart excellent gloss and to achieve set speeds equivalent to conventional solids sheetfed ink.

The unique vehicle system of Aries allows ink makers to formulate high viscosity, low yield value inks commonly associated with high quality ink systems. It also offers the flexibility to formulate high solids systems, work and turn, dry offset and inks for various substrates.
